

# brainstrust

the Meg Jones tumour charity

Aged 19, Meg was diagnosed with a brain tumour, just as she was beginning life at university. Meg has been fortunate – her tumour was successfully resected in Boston, USA. **brainstrust** enabled her to seek the treatment she needed and the prognosis for Meg is now excellent.

Since Meg's diagnosis, we have discovered that there isn't much 'out there' in terms of coordinated support. **brainstrust** is dedicated to improving clinical care for brain tumour sufferers and providing co-ordinated support in their search for treatment, through establishing a pioneering brain tumour research and treatment centre in the UK – The **brainstrust** Centre of Excellence. **brainstrust** is proactive, not reactive and is addressing the lack of UK wide strategy for the treatment of, and research into, brain cancer. We explore the availability of treatment – worldwide.

**brainstrust** – good for brains, bad for brain tumours.
